

Noelia Caridad

I am a passionate woman, devoted to my profession, constantly rediscovering myself, and daily gaining new knowledge.

My first steps were at University of Buenos Aires (UBA), where I graduated as Bachelor in Labor Relations in 2002. Then, my thirst for knowledge and my passion for people inside and their challenges to growth were leading me towards Organizational Psychology. In 2007 I achieved a Professional Ontological Coach certification at the Latin American School of Coaching (Escuela Lationamericana de Coaching -ELAC) and in 2009, I obtained a postgraduate degree in Change Management within the Organizations at the School of Psychology (UBA). Later on, I attended the School of Tato Pavlosky for two years to become a Psychodramatist. My intentions to strengthen my credentials as Coach led me to specialize in Organizational Coaching and Executive Coaching during 2013 and 2014 and my interest in improving my skills in corporate communication for organizational development led me to do a postgraduate course in Corporate Communication at Austral University".

Since 2014 to date I have found out a way that makes me feel more connected with my inner development, with my emotional, physical and mental balance, which makes me more compassionate and reflexive towards others as well as better connected to those around me... the Art of Living programs, Mindfulness certifications and my current training as a Jungian astrologist, are part of this way deep inside in order to be reborn.

The pursuit of BEING THE MASTER OF WHAT WE WANT TO HAPPEN, EVEN IN DISTRESSING SITUATIONS, made me found Caridad Relaciones Efectivas in June 2005, offering my services as a Consultant in Human Resources Management within organizations and for individuals. 2016 found us eager to be reborn and that is why we opened our new office in Tierra del Fuego, Ushuaia, with the intention of providing solutions in the southernmost spot of our country and, from that place, becoming a comprehensive, different and solid offer to all those that believe in our philosophy. On the other hand, we have built an alliance with Liderarte & Performance to have a presence all over Latin America to deal with issues related to the Development of Soft Skills, Coaching Programs and Organizational Development, and we have opened up the USA market carrying out projects for Staff Selection, Interpersonal Skills Training, Organizational Development and Executive Coaching Conversations. Since then to date I have been working with a team of professionals and back Office staff, to whom I am very thankful for all the achievements that we have accomplished for ourselves and for the organizations that have chosen us.
